SKILLS

- **Languages:** JavaScript, Python, C++, PHP
- **Frameworks:** React.js, Node.js, Express.js, Bootstrap
- **Libraries:** Axios, Mongoose, JWT, React Router
- **Tools/Platforms:** MongoDB, MySQL, Git & GitHub, Postman, VS Code
- **Soft Skills:** Problem-Solving, Team Collaboration, Debugging, Adaptability

PROJECTS

Cost-Effective Parking Solution: Mar' 25 – May' 25

- Settled a full-stack booking and payment web platform using PHP, MySQL, HTML, CSS, and JS.
- Built user authentication modules including signup, login, and form-processing workflows.
- Designed multiple product/price display pages with interactive UI components.
- Executed secure form validation and backend logic for smooth user experience.
- Integrated media elements (images, videos, QR code) to enhance usability and visual appeal.

Tech: PHP, MySQL, HTML, CSS, JavaScript.

Mental Health Simulator: Jun' 25 – Jul' 25

- Developed a Java-based application to assess and manage mental health information through an interactive user interface.
- Implemented core features such as user input handling, data validation, and report generation for better mental health awareness.
- Used Object-Oriented Programming principles to design modular and reusable code components.
- Enhanced system reliability and usability through efficient exception handling and structured data management.

Tech: Java, OOPS, File Handling, Data Structures and Algorithms.

TRAINING

Cipher Schools (Edtech Company) [View](#) Jun' 25 – Jul' 25

- Mastered fundamental and advanced Data Structures (arrays, linked lists, stacks, queues, hash tables, trees, heaps, and graphs), focusing on performance analysis using Big O notation to evaluate time and space complexity.
- Progressive and implemented various Algorithms, including Sorting (Quick Sort, Merge Sort, Heap Sort), Searching (Binary Search, BFS, DFS), Graph Algorithms (Dijkstra's, Bellman-Ford), and Dynamic Programming, applying them to real-world scenarios like network routing and database indexing.
- Engaged in optimization, transforming initially functional but inefficient code, to achieve significant performance improvements by shifting algorithms from $O(n^2)$ to $O(n \log n)$ or $O(n)$ complexity, and using efficient structures like Hash Maps for constant-time data lookups.

CERTIFICATES

- Introduction to Hardware and Operating Systems | [Coursera](#) Sep' 24
- Legacy Responsive Web Design V8 | [FreeCodeCamp](#) Nov' 23

EDUCATION

- **Lovely Professional University** Phagwara, Punjab
Bachelor of Technology - Computer Science and Engineering; CGPA: 6.10 Aug' 23 – present
- **Sri Chaitanya Junior College** Vijayawada, Andhra Pradesh
Intermediate; Percentage: 79% Jun' 21 – Mar' 23
- **Sri Sai Vidyanikethan High School** Badvel, Andhra Pradesh
Matriculation; Percentage: 100% Jun' 20 – Mar' 21
